

CITY-PARISH DIGITAL INITIATIVES

Our Department of Information Services is dedicated to creating a more efficient, effective, and responsive City-Parish government through initiatives focused on developing Baton Rouge into a hub for digital and technological innovation.

SOCIAL MEDIA

BRGOV.COM/GETSOCIAL

Our social media accounts exist to engage Baton Rouge citizens in meaningful ways – from Facebook and Twitter to live streaming services like Periscope.

GEOGRAPHIC INFORMATION

GIS.BRLA.GOV | DATA-EBRGIS.OPENDATA.ARCGIS.COM

- More than 60 web maps and apps
- Over 100 printable reference maps
- Public Safety Common Operational Platform
- More than 100 authoritative map layers available to download in EBRGIS Open Data

WAZE

WAZE.COM

We partnered with Waze, a Google-owned traffic and navigation platform, to share our road closure and incident data in real time. We also have access to the platform's crowd-sourced data from more than 35,000 "Wazers" in Baton Rouge, which we are integrating with our GIS program to further enhance our mapping capabilities.

EXPRESIT

BRGOV.COM/EXPRESIT

Has a City-Parish employee provided you with exceptional service? Let us know through our new feedback system – online or through the free mobile app, available for download in the Apple App Store or the Google Play Store!

RED STICK 311

311.BRLA.GOV

Red Stick 311 is a new way for Baton Rouge citizens to request services and report issues while "on the go" – online or through our free mobile app, available for download in the Apple App Store or the Google Play Store. Residents can even use the platform to monitor the progress of issues they've reported.

OPEN NEIGHBORHOOD BR

MY.BRLA.GOV

A map-based platform designed to provide residents with up-to-date, neighborhood-based information on crime, traffic, 311 requests for service, permits, and more. Create an account to save searches and receive email alerts on new incidents.
